

WINTER 24 / 25
ISSUE 18

PRODUCT CATALOGUE

THE ORIGINAL

Airhole is built for a life outdoors and protects adventurers from the elements with the world's best technical face protection.

Tired of the lack of face protection available and facing severe weather in the backcountry, Canadian professional snowboarders **Chris Brown** and **Kale Stephens** knew there had to be a better way of dealing with a wet mask from heavy breathing and extreme conditions.

Taking to Kale's Grandma's old sewing machine, they re-purposed discarded outerwear jackets, cutting them into different shapes, sizes and fits to find the perfect mask. The result was the **patented Airhole breath hole** built into ergonomically shaped masks made from technical fabrics.

Since 2006, Airhole has continued to develop and lead the facemask industry with technical fabrics, tailored fits and the best graphics.

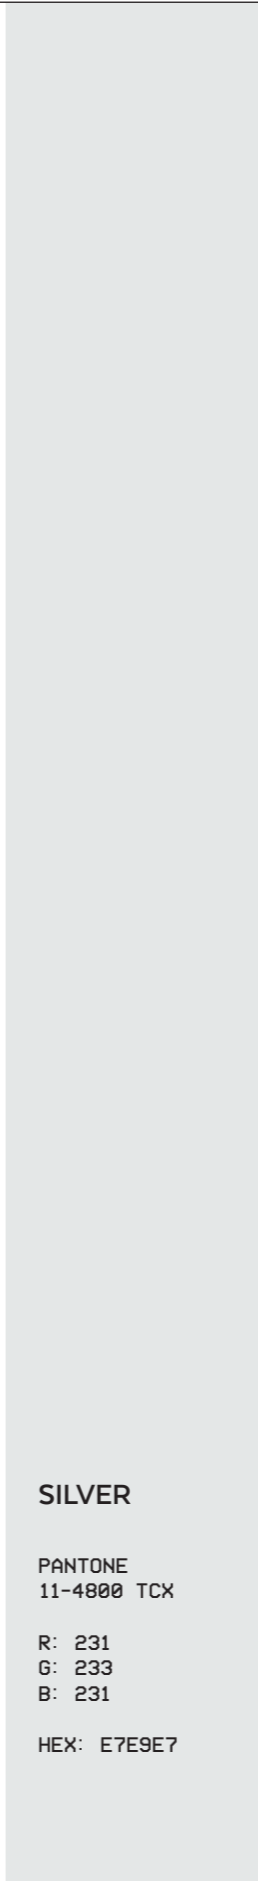

Our mission: to
defend adventurers
from the elements.

Our catalogue is arranged by fabric rather than style. We spend hundreds of hours every year on the mountain testing the best technical fabrics for our brand and we want to ensure you have the best possible protection against the elements. We are proud of our collection of technical fabrics and encourage you to Feel The Difference.

ARTISTS + ATHLETES

Terje Håkonsen by Jimmie Okayama

Terje Håkonsen

SM / ML

One of, if not *the* most influential snowboarder in history, Terje needs no introduction. An advocate and supporter since day one, Terje's collection kicks off our epic collaboration with the styles and fabrics he uses throughout the season. From the deepest powder of Japan to the spring slush of Norway, Terje will be repping his collection.

Blotto

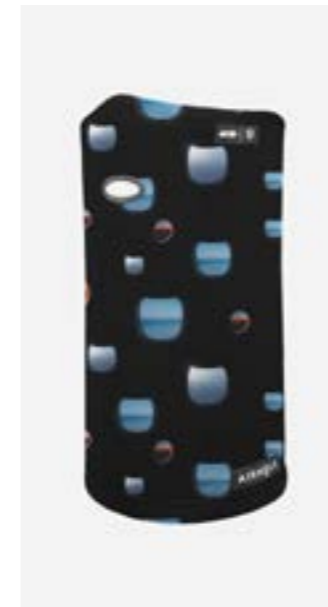

SM / ML

“When thinking of Dean Blotto Gray, many people will first think of Blotto. The household nickname has become ubiquitous with the life he’s built around a union of connection and creativity. Raised in the Southwest (USA) and propelled around the globe by the stories he both lives and tells, Dean’s passion for creation has blossomed into a diverse body of work. His products take many forms: photographs, scrapbooks, abstract painting, immersive collaged environments, travel books, photo shows, product and art collaborations, and much more. While the formats he works within change, the content consistently focuses on the

stuff of memories—exceptionally sensory moments in real human life. Many of his subjects involve skateboards, snowboards, and other vehicles for interacting with our surroundings, but always people, the natural world, or both. While he currently resides on the East Coast, he considers himself at home wherever the job, family, or friends take him, and remains joyfully committed to finding new and unique ways to share his discoveries along the way.”

Pioneering Whistler Snowboard crew, Shmobb:

“Shmobb is a group of boarders that share the same passions from meeting new people to traveling the world, snowboarding has given us an outlet to fully be ourselves and with that we created a family. Shmobb is a group of like-minded individuals who became family through snowboarding.”

Riders: Caleb Chomlack, Truth Smith, Lane Weaver, Jacob Lagault, Dash Klebe-McCulloch, Finn Finestone.

Chad Chomlack

SM / ML

Photographer and journalist, Chad Chomlack is a personable, relateable and down-to-earth guy. These characteristics flow into his work so effortlessly and honestly. The images Chad likes to shoot are often stark and emotional: simple elements held in perfect balance.

Chad lives for discovering other cultures and documenting the stories of strangers' that soon become friends. He is at peace in the mountains and hopes to share the joy he finds in the back country with those around him.

"Often my favorite images emerge and are born in moments of stillness and silence...this image came from that space."

- 003 HIGHLY BREATHABLE
- 004 MOISTURE WICKING
- 005 DESIGNED WITH SUSTAINABLE FABRICS

POWER DRY

Feel the difference.

Polartec® Power Dry® is the most advanced next-to-skin moisture management fabric.

This bi-component fabric technology is constructed with a hydrophilic interior to pull moisture away from the skin and transfer it to the outer layer. Power Dry's exterior surface area disperses and releases this moisture for more efficient dry times. Continuous evaporation prevents saturation and regulates temperature in both hot and cold conditions.

SHEARLING FLEECE

Polartec® Shearling Fleece, made from Thermal Pro®, brings advanced functionality to a classic, high-pile look.

Before synthetic fleece, Shearling’s bulky warmth was the norm. The traditional knit, napped, and sheared finish delivers timeless style and unparalleled comfort in this more breathable, pill-resistant update.

Shearling technology diversifies style options for most fleece weights. Specialized yarn selection and masterful finishing processes produce a luxurious texture and classic look that offers superior warmth. Shearling fleece sets the standard for cozy, high-pile insulators.

100
SERIES

In 1981, Polartec® forever changed the way the world dresses for cold weather with the invention of polar synthetic fleece.

Polartec® was the first to knit, nap, and shear synthetic yarns into thermal fabric for outdoor apparel. Polyester fibers were engineered for more versatile durability. With greater resiliency, lightweight warmth and fast dry times, Polartec® fleece remains the industry standard for outerwear performance.

Premium polyester yarns are used for their hydrophobic properties, to repel moisture and speed dry times. The lofted structures create thermal air pockets to retain warmth, and still allow optimal breathability.
