

# ENDEAVOR

# END EAVOR

**ALWAYS** [awl-weyz] - Without exception; continuously; forever.

**ENDEAVOR** [en-dev-er] - To exert oneself to do or effect something; make an effort; to strive.

We **ALWAYS ENDEAVOR** to inspire snowboarders by creating performance products that provide meaning and inspiration.

≡ **ENDEAVOR**

Winter 2024 / 25

I found snowboarding in 1989 when I was 10 years old – a friend’s older brother was into skateboarding and snowboarding in Vancouver in the winter was the logical activity. It only took a day on my Blacksnow Edge at the Mt. Seymour rope to become addicted.

BCSA competition circuits followed, road trips with riders 10 years older than me, and a summer job at Option Snowboards solidified my future in snowboarding. With Craig Kelly as my inspiration, I was determined and relentless to become a professional snowboarder.

Eleven years later after magazine covers and video parts, I jumped at the idea to make my own snowboards and launched Endeavor in 2002.

Snowboards are a labour of love – it’s not the easiest category to design and manufacture but it certainly is the most fun. Adding an outerwear and luggage collection completes the eco-system and we’re proud of the collection we have created this season – we know you will love it as much as we do.

Always Endeavor.

# KEY TECHNOLOGY

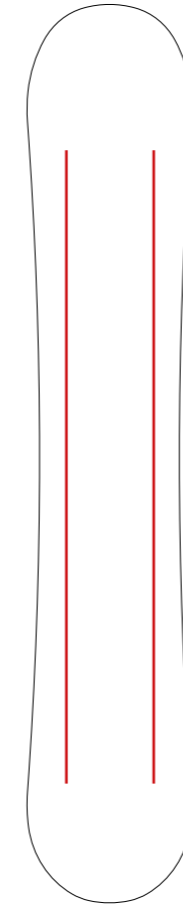

## THE CHANNEL™

Strong, faster, easier and designed to help dial-in the perfect stance for you. The Channel® gives you the ultimate control of your stance and your board in a design compatible with all major bindings.

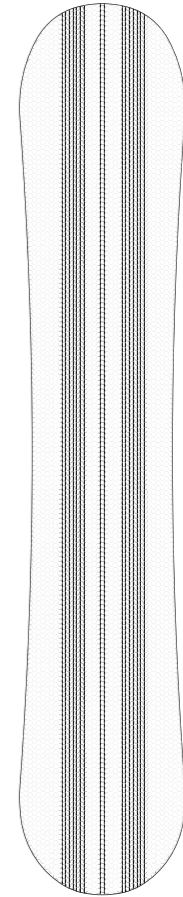

## SMOOTHRIDE SIDEWALLS

Infused urethane sidewalls which reduce vibration and impact, similar to how urethane skateboard wheels create a smooth ride on rough concrete. Dampening the ride, reduces board chatter and leg fatigue and provides the smoothest ride ever.

## INERTIA CARBON RODS

Endeavor Inertia Carbon Rod technology revolutionizes the physical properties of carbon inserts. Unlike traditional carbon layups, our Inertia Rods are made in a similar process to carbon fishing rods. This produces incredibly strong, 3 dimensional rods with a variable diameter that can be tailored to produce specific rates of flex and rebound in any direction. This results in unparalleled rates of response, predictable and consistent flex and durable strength that doesn't deteriorate over time.

## PHONON PRE-TENSION FIBREGLASS TOPSHEET

Ut Tensio, Sic Vis, "as the extension, so the force".

The Phonon Pre-Cured Fibreglass Topsheet supercharges snowboard construction. Elastic energy built up in the continuous lamination process is released when you flex the board. The result is a super lightweight, powerfully reactive ride, whether springing out of turns or popping off jumps.

# THE QSL SERIES

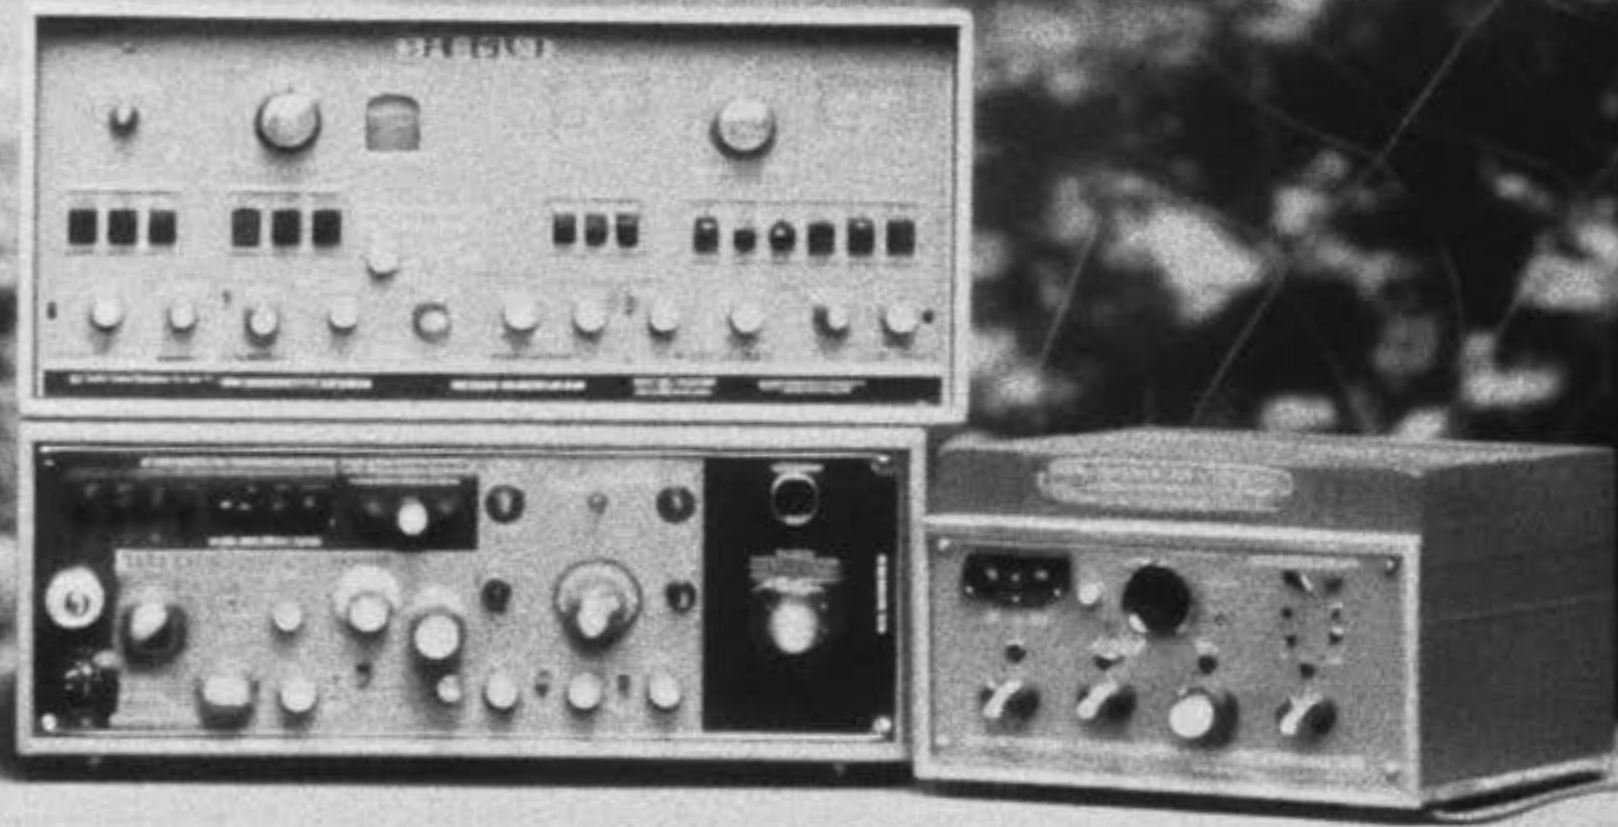

Do you confirm receipt of my transmission?

The inspiration behind the QSL series is derived directly from the QSL cards that are a visual representation of two-way radio communication.

The history of two-way radio dates back to the late 19th century, however, it gained significant prominence during World War I, when it was used for military purposes. After the war, it found applications in public safety, transportation, and amateur radio.

The term "QSL" originates from the radio Q code used for confirmation or acknowledgment. In the early days of amateur radio, operators would send postcards or cards to confirm successful radio contacts. These cards evolved over time and became personalized, often featuring unique designs, illustrations of radio equipment, call signs, and artistic elements.

It is from these cards that the QSL Series takes its graphic inspiration. Each board acts as its own unique QSL, featuring graphic hits inspired by original cards, a series of coordinates and a hidden call sign; all the information needed to send a return QSL.

# THE DIRECTORS SERIES

This is where shape and material innovation comes to light, alongside the creative freedom with graphics and aesthetic processes. Max chose two of his tattoos designed by artist Okan Ukun, illustrating two mountain silhouettes close to him – one seen in Whistler, Canada and the other in East Cape, Mexico. A long single Channel lends to the aesthetic while enabling fun and wild stance options.

The new shapes are a combination of surf inspired shapes created by surfboard shaper and snowboard enthusiast Doug Moreau (the Trooper and Free Ranger), bringing an old 3D camber shape back in the line and renaming it the Apollo, and bringing an old skateboard inspired shape into the line (inspired by the old High Five) called the Rover.

# SKULL SKATES

Skull Skates is Canada's oldest skateboard company dating back to 1976. Situated in Vancouver, British Columbia, PD and the crew have been trailblazers in the skate community, always staying consistent with their brand image; the iconic black and white skull graphic which was first carved out of grip tape.

During Winter, PD hits the local mountains. Our collaboration brings back his favorite Crystal Ocean shape from the archives adorned with the iconic skeleton graphic.

# LEE MCCONNELL

Lee McConnell is a multifaceted artist working across various mediums including illustration, design, animation, painting and sculpture since 2011.

His work tells stories of everyday life with subtle twists, messaging and light hearted humour. His use of bold colour throughout gives a sense of euphoria with his subjects drawn from inspiration looking at picture books and watching animated cartoons as a kid.

THE  
LEGACY  
COLLECTION

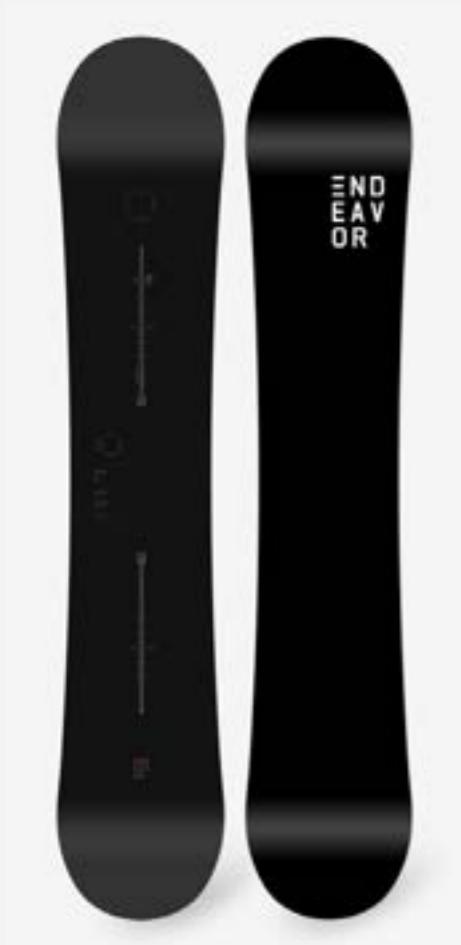

Drawing inspiration from Max's summers spent at the legendary Option Snowboards factory and his personal preferences as a pro rider, Endeavor tirelessly pursued this rare snowboard construction method featuring continuous laminated fiberglass as the topsheet we call our Phonon Topsheet. The outcome? The pinnacle of snowboarding excellence that we call the Legacy Collection.

**UTILITY BOARD BAG**

OS

The Utility bag is our ultimate snowboard transportation option. Whether it's for your dream trip to Japan or your weekly pilgrimage to the local hills the Utility roller bag will keep your gear protected.

The Utility features enough space for multiple boards and all your other gear so you can ditch the suitcase. But just in case you don't we've included our stow-able cargo strap system that allows you to attach almost any wheeled case or duffle bag to the outside of the board bag. Simply open the zipper on the bottom of the bag, pull out the straps, cross them over your bag and hook them through the attachment loops on the top of the board bag. Bags with an extendible handle can also be attached via the oversize velcro handle on the end of the bag for more secure rolling.

The Utility is also equipped with a host of other great features including 2 lightweight packing cells that can fit boots with ease, secure board straps, side carry handle, top lugging handles and external compression straps.

## PROFILES

### TRADITIONAL CAMBER

TRADITIONAL CAMBER IS AN INSTITUTION. WITH A POSITIVE ARCH SHAPE FROM TIP TO TAIL, THIS PRELOADS THE BOARD WITH TONS OF ENERGY FOR A LIVELY AND RESPONSIVE FEELING IN ALL CONDITIONS.

### MULTI CAMBER

OUR MULTI CAMBER COMBINES TRADITIONAL CAMBER WITH AN EARLY RISE TIP AND TAIL PROFILE. THIS INCREASES VERSATILITY ACROSS ALL TERRAIN AND REDUCES THE CHANCE OF CATCHING AN EDGE.

### 3D CAMBER

3D CAMBER COMBINES TRADITIONAL CAMBER WITH A 3D SHAPE AT THE NOSE AND TAIL. JUST LIKE THE BACK OF A SPOON, THIS LIFTS THE NOSE, TAIL AND CONTACT POINTS OFF THE SNOW TO INCREASE VERSATILITY AND REDUCE HANG UPS IN SOFT SNOW WITHOUT COMPROMISING STABILITY OR GRIP ON HARD SNOW.

### HOVER CAMBER

FEATURED EXCLUSIVELY ON OUR POWDER QUIVER RANGE, HOVER CAMBER COMBINES TRADITIONAL CAMBER BEHIND THE FRONT FOOT TO THE TAIL WITH AN ELONGATED EARLY RISE OUT TO THE NOSE. THIS RAISES THE NOSE OUT OF SOFT SNOW AND ALLOWS THE TAIL TO SINK IN ALLOWING YOU TO SURF THROUGH THE SOFT STUFF.

## SHAPES

### DIRECTIONAL

OUR DIRECTIONAL BOARDS HAVE A RAISED NOSE AND A FLATTER TAIL WITH A DIRECTIONAL SHAPE AND FLEX. WITH A LONGER NOSE THAN TAIL, THESE BOARDS HAVE UNPARALLELED POWDER PERFORMANCE AND STABILITY IN ALL CONDITIONS.

### DIRECTIONAL TWIN

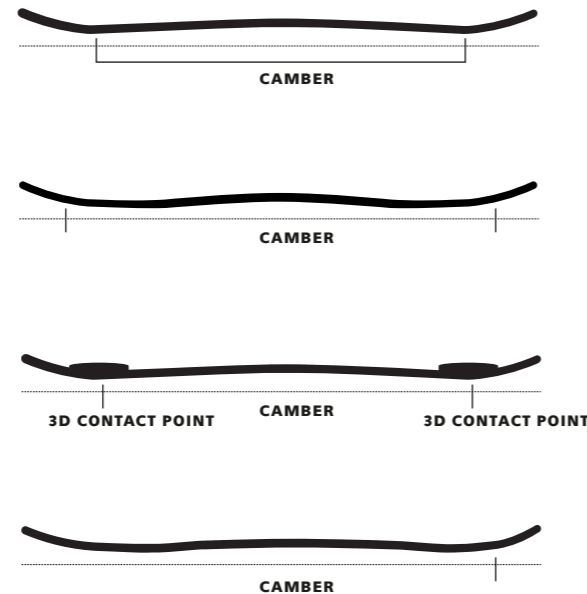

OUR DIRECTIONAL TWIN BOARDS FEATURE A CLASSIC SNOWBOARD SHAPE THAT CAN BE RIDDEN REGULAR OR SWITCH BUT HAVE A SLIGHTLY LONGER NOSE THAN TAIL. THESE BOARDS PERFORM INCREDIBLY WELL ACROSS ALL TERRAIN WITH BALANCE AND PRECISION.

### TRUE TWIN

OUR TRUE TWIN BOARDS ARE IDENTICAL END TO END. CUT THEM IN HALF AT THE WAIST AND YOU WON'T BE ABLE TO TELL THE DIFFERENCE. WITH PERFECT SYMMETRY AND BALANCE THESE BOARDS ARE INCREDIBLY VERSATILE AND ALLOW YOU TO TAKE ON ALL TERRAIN FROM GROOMERS TO POWDER AND PARK.

### WIDE BOARDS

OUR WIDE BOARDS ARE DESIGNED FOR RIDERS WITH SLIGHTLY LARGER FEET ALLOWING THEM TO RIDE ALMOST ALL OF OUR BOARDS WITHOUT THE FEAR OF HEEL OR TOE DRAG.

## TOPSHEET

### PU W/ UV LACQUER

OUR TOPSHEETS ARE DIRECT DIGITALLY PRINTED AND COATED WITH A PROTECTIVE UV STABILIZED LACQUER IN EITHER MATTE OR GLOSS. OTHER GRAPHIC DETAILS ARE ADDED SUCH AS CLEAR PRINTS AND GRAPHIC SCREENS TO GIVE ALL OF OUR BOARDS THE BEST AESTHETIC POSSIBLE.

## BASES

DURABILITY AND SPEED IN A HIGHLY ABSORBENT PACKAGE MEANS THESE BASES WILL NEVER SLOW YOU DOWN. WE WORK CLOSELY WITH OUR SUPPLIERS TO ENSURE WE HAVE THE BEST QUALITY BASES FOR OUR BOARDS. ALL ENDEAVOR BASES ARE DIE CUT PIGMENTED BASE MATERIAL AND ARE FINISHED BY A BELT SANDING PROCESS AND FACTORY HOT WAXED SO IT CAN PERFORM RIGHT OUT OF THE BAG.

### P-TEX 3000

P-TEX 3000 FROM CPS IS A HIGHLY WAX ABSORBENT (1.55 MG/CM<sup>2</sup>) SINTERED BASE THAT HAS PROVEN LONGEVITY AND SPEED.

### ISO SPEED 7500

OUR ISO SPEED 7500 FROM ISO SPORT IS OUR PREMIUM SINTERED BASE THAT PROVIDES 2.00 MG/CM<sup>2</sup> OF WAX ABSORBENCY THAT GIVES A SUPERIOR SLIDE AND THE HIGHEST LEVEL OF DURABILITY.

## FIBREGLASS

### PRE-CURE

ALL BOARDS INCLUDE A PRE-CURED TRI-AXIAL TOP LAYER OF FIBREGLASS. THESE ARE SOLID, HIGH STRENGTH LAMINATES CONSISTING OF FIBREGLASS PREPREG REINFORCED WITH HIGH STRENGTH EPOXY RESIN AND ONCE SANDED, PROVIDE SUPERIOR STRENGTH AND AESTHETIC FINISH.

### TRI-AXIAL

MULTI-AXIS, STITCHED FIBREGLASS LAMINATE PROVIDE A STIFFER, MORE RESPONSIVE FLEX AND GREATER TORSIONAL RIGIDITY TO GIVE THE BOARD PRECISION AND POWER IN A SUPER STABLE AND VERSATILE PACKAGE.

### PHONON PRE-TENSION

THE PHONON PRE-CURED FIBREGLASS TOPSHEET SUPERCHARGES SNOWBOARD CONSTRUCTION. ELASTIC ENERGY BUILT UP IN THE CONTINUOUS LAMINATION PROCESS IS RELEASED WHEN YOU FLEX THE BOARD. THE RESULT IS A SUPER LIGHTWEIGHT, POWERFULLY REACTIVE RIDE, WHETHER SPRINGING OUT OF TURNS OR POPPING OFF JUMPS.

## MOUNTING

### THE CHANNEL™

THE CHANNEL™ IS SNOWBOARDING'S ULTIMATE CONNECTION ALLOWING FOR INFINITE STANCE OPTIONS AND RAPID ADJUSTMENT. THE CHANNEL™ IS COMPATIBLE WITH ALL MAJOR BINDING BRANDS.

### INSERTS

THE TRADITIONAL SNOWBOARD INSERT MOUNTING SYSTEM OFFERS STABILITY AND CONTROL, ENSURING A SOLID CONNECTION BETWEEN THE RIDER AND THE BOARD. INSERTS REMAIN A POPULAR CHOICE FOR THEIR RELIABILITY AND VERSATILITY, MAKING IT A GO-TO OPTION FOR SNOWBOARDERS OF ALL SKILL LEVELS.

## EDGES

### ROCKWELL 48 STEEL

INCREDIBLY DURABLE STEEL EDGES PREVENT BLOWOUTS AND BREAKAGE ALLOWING YOU TO RIDE HARDER WITH MORE CONFIDENCE.

### RUBBER DAMPENING

RUBBER STRIPS ARE ADDED ALONG THE EDGES OF THE BOARD TO REDUCE VIBRATION AND CHATTER FOR A SMOOTHER, MORE COMFORTABLE RIDE.

## CORES

### POPLAR/PAULOWNIA WOODCORE W/ BIRCH REINFORCEMENT

A BLEND OF LIGHTWEIGHT YET STRONG WOODS TO PROVIDE POWER, PRECISION AND BALANCE WITH CONSISTENT FLEX CHARACTERISTICS. LIGHTER YET STRONGER THAN OUR FULL POPLAR CORE, THIS BLEND INCREASES RESPONSE AND PRECISION. BIRCH REINFORCEMENT IN ALL OF OUR BOARDS INCREASES DURABILITY FOR GREATER CHANNEL™ RETENTION.

## ADDITIONAL FEATURES

### CARBON

CARBON BEAMS ARE PLACED IN STRATEGIC POSITIONS TO INCREASE POP AND SNAP WITHOUT ADDING OVERALL WEIGHT COMPARED TO TRADITIONAL FIBREGLASS ONLY CONSTRUCTIONS. CARBON ALSO ADDS FLEX MEMORY, SUPPORTING THE CAMBER SHAPE SO THE BOARD REMAINS LIVELY OVER TIME AND USE.

### SMOOTH RIDE

INFUSED URETHANE SIDEWALLS WHICH REDUCE VIBRATION AND IMPACT, SIMILAR TO HOW URETHANE SKATEBOARD WHEELS CREATE A SMOOTH RIDE ON ROUGH CONCRETE. DAMPENING THE RIDE, REDUCES BOARD CHATTER AND LEG FATIGUE AND PROVIDES THE RIDER WITH THE SMOOTHEST RIDE EVER.

### INERTIA CARBON RODS

THREE DIMENSIONAL CARBON RODS WITH A VARIABLE DIAMETER ARE TAILORED TO PRODUCE SPECIFIC RATES OF FLEX AND REBOUND. UNLIKE CARBON STRIPS THAT CONFORM TO THE SHAPE OF A BOARD'S CORE AND CAN ONLY FLEX ALONG ONE AXIS, INERTIA RODS CAN FLEX AND REBOUND IN ANY DIRECTION FOR UNPARALLELED RATES OF RESPONSE, PREDICTABLE AND CONSISTENT FLEX AND DURABLE STRENGTH THAT DOESN'T DETERIORATE OVER TIME.
