

AIRHOLE

---

WINTER 2017/18

# LET'S GO TO NEW PLACES

---

Airhole has been a leader in the facemask industry for 10 years and we continue to improve. For 2017, we introduce revised logos, superior technical fabrics, improved functioning mask shapes, new team members and an increased marketing drive to secure our position as leader in the market.

**#AIRHOLE**

# THE AIRHOLE

---

## **The Original Airhole Mouth Piece**

L'Embouchure Airhole d'origine  
オリジナルAirholeマウスピース  
Das Original Airhole Mundstück

## **Breathe Free with Airhole**

Respirez gratuit avec Airhole  
Airholeを通し、自然な呼吸が可能  
Freies Atmen mit Airhole

## **Ultimate Protection and Warmth**

Protection Ultime et Chaleur  
究極のプロテクションと高い保温性  
Ultimativer Schutz und Wärme

## VELCRO INNOVATION

---

### Easy Use Soft Velcro

Velcro Souple Facile à Utiliser  
ソフトなマジックテープ

Leicht zu benutzender weicher Klettverschluss

### Hooks Don't Catch On Hair

Les crochets ne s'accrochent pas aux cheveux  
フックは、髪に引っかかりません

Haken fangen nicht auf dem Haar

### Applique Process Allows Unlimited Movement

Applique processus permet un mouvement illimité  
アプリーケプロセスは、無制限の動きを可能にします

Applikationsprozeß erlaubt unbegrenzte Bewegung

## WATER RESISTANCE

---

### DWR Coated for Water Resistance

Revêtement DWR pour Résistant à l'eau  
DWR撥水加工済み

Wasserabweisende DWR Imprägnierung

### 10,000mm Water and Wind Resistant

10,000mm Résistant à l'eau et le vent

10,000mm の防水と防風

10,000mm Wassersäule und Wind abweisend

### 20,000mm Water and Wind Resistant

20,000mm Résistant à l'eau et le vent

20,000mm の防水と防風

20,000mm Wassersäule und Wind abweisend

## UPF PROTECTION

---

**All Airholes have a minimum of 50 UPF, blocking at least of 98% of the sun's harmful UV rays.**

Tous les aérateurs ont un minimum de 50+ pour un minimum de 98% de protection solaire.

全てのAirholesには少なくとも50%のUPFがあり、少なくとも98%の日射保護

Alle Airholes haben mindestens 50 UPF für mindestens 98% Sonnenschutz

## RECYCLED FABRIC

---

**100% Recycled Polyester with Duck Down**

Polyester recyclé à 100% avec Duvet d'oies

100%リサイクルポリエステルと羽毛

100% Recyceltem Polyester mit Ente unten

**2 Layer DWR Coated Recycled Polyester**

Revêtement DWR 2 Couches - Polyester recyclé

DWR加工が施された2層のリサイクルポリエステルを使用

2 Layer DWR Coated Wiederverwertbare Polyester

**3 Layer DWR Coated Recycled Polyester**

Revêtement DWR 3 Couches - Polyester recyclé

DWR加工が施された3層のリサイクルポリエステルを使用

3 Layer DWR Coated Wiederverwertbare Polyester

**Yarn made from Recycled PET Bottles**

Fils en PET recycle

リサイクルペットボトルから作られた糸

Garn aus recycelten PET-Flaschen

## TECHNICAL INFORMATION

### KEY FEATURES

#### THE AIRHOLE

Featured on all of our masks, the Airhole allows breath to escape freely, avoiding the build up of condensation to keep you warm, dry and your goggles fog free. A dry mask ensures all day comfort and no bad odours.

#### DIRECT INJECTED SILICONE AIRHOLE

The Direct Injected Airhole is applied with silicone directly to the fabric, bonding to the front and back to provide a comfortable, hygienic and easy to clean finish.

#### WELDED AIRHOLE

The Welded Airhole is laser cut and heat transferred to the fabric to provide a lightweight, technical and minimal finish.

#### EMBROIDERED AIRHOLE

The Embroidered Airhole is a traditional sewing method used with knitted fabrics such as merino, cashmere or double layer microfleece to provide a soft, comfortable finish.

### FABRIC DESCRIPTIONS

#### 2 LAYER

2 Layer is a high performance dual layer fabric featuring a weather and 10,000mm water-resistant outer and a soft, comfortable lining that is perfect for all conditions.

#### 3 LAYER

3 Layer is our most technical fabric construction, featuring a hypoallergenic finish, windproof fabric, 20,000mm water repellency and a soft lining. These masks ensure comfort and performance in harsh conditions.

#### CASHMERE

Cashmere is a super soft, luxurious fabric that is lightweight, ultra warm and more compact than man made fibres. By blending with Merino wool we get a highly technical finish that manages heat, wicks moisture and prevents odors in colder conditions.

#### DRYLITE

Drylite is a lightweight, seamless construction that acts like a second skin. With incredible moisture wicking properties and our UPF 50 finish, Drylite is ideal for spring conditions.

#### DWR (DURABLE WATER REPELLANT)

DWR is a durable fabric coating which gives our masks water repellent properties and is used to prevent the face and outer layer of the fabric from becoming saturated with water.

#### 10,000mm WATERPROOF

Fabrics with a 10,000mm rating resist light rain, average snow and light water pressure to keep you warm and dry in most conditions.

#### 20,000mm WATERPROOF

Fabrics with 20,000mm rating resist heavy rain, wet snow and higher water pressure to keep you warm and dry in harsher conditions.

#### QUICK DRY

Our quick drying fabrics allow water, perspiration and condensation to evaporate much faster by distributing moisture across a larger surface area, keeping your skin warm and dry.

#### DRYTECH

Drytech is a high performance microfibre construction that wicks moisture and regulates temperature, making it perfect for all conditions.

#### FEATHERLITE

Featherlite is a seamless construction that has superior moisture wicking properties and a comfortable stretch design. Favoured by our pro athletes, Featherlite performs in all conditions.

#### INSULATED

Insulated fabrics 2 layer 10,000mm water resistant, are 100% down filled with a soft Tricot lining to provide the warmest finish with minimal weight. These masks are guaranteed to keep the cold at bay in harsh conditions.

#### MERINO

Merino wool is a highly technical, natural fibre that has superior heat managing and moisture wicking properties and prevents odor. Merino is lightweight allowing facemasks to be smaller and more compact without sacrificing performance in all conditions.

#### RECYCLED FROM PET BOTTLES

Our recycled fabrics are made from 100% certified recycled PET (Polyethylene terephthalate) plastic bottles. Used water bottles are crushed, chipped, melted and extruded to make high quality polyester fibres.

#### ULTRAVIOLET PROTECTION FACTOR

The UPF rating indicates how effectively fabrics shield skin from harmful ultraviolet (UV) rays. The higher the UPF number, the greater degree of UV protection a garment offers. All Airholes have a minimum UPF rating of 50, blocking 98% of harmful UV rays.

#### VELCRO INNOVATION

Our easy to use Velcro is now softer than ever and the applique design keeps masks flexible for unlimited movement, less bunching and prevents hair from catching.

#### MOISTURE WICKING

Our moisture wicking fabrics draw sweat, perspiration and condensation away from the skin keeping you warm and dry. Moisture evaporates from the fabric surface rather than getting trapped inside.

#### MICROFLEECE

Microfleece is a traditional lightweight, soft fabric that stays warm even when wet. With great moisture wicking properties and our DWR coating it keeps your face cozy and warm in varied conditions.

#### POLAR

Polar is a high performance microfibre construction that wicks moisture and protects against cold and heat. Polar is our most popular fabric construction thanks to its versatility in all conditions.

#### WAFFLEKNIT

Waffle Knit is a technical gridded fleece fabric that repels weather and allows air to flow freely to keep you warm and dry. Waffle Knit is stretchy, comfortable and great for all conditions.

### MASK SILHOUETTES

#### AIRTUBE

Our classic Airtube shape has a straight top and bottom finish for an easy-to-wear fit. Wear it down as a cozy neck gaiter, as a headband to keep your ears warm or pull it up to seal out the elements.

#### FACEMASK BANDANA

Our Standard Lite facemask is where Airhole began. Like a traditional bandana, this facemask is made technical by including the signature Airhole breath hole, specialist fabrics, and our Velcro innovation.

#### BALACLAVA CLASSIC

Our classic Balaclava shape provides head and full-face protection. The Balaclava Classic has a perfect fit under helmets by eliminating the need for a beanie.

#### BALACLAVA FULL HINGE

A brand new shape for this season, our Full Hinge Balaclava provides more flexibility to the wearer by splitting the top and bottom sections, giving you 4 masks in 1. The full balaclava seals out the elements whilst the front can hinge down to free your face. Keep the face up and pull down the top for better temperature control or pull it all down for a classic neck gaiter.

### MASK USE AND SIZE

#### MASK SIZING

Airhole masks are available in different sizes depending on the fabric and shape. One Size masks are made from super stretchy fabrics which can accommodate multiple head shapes and sizes. S/M masks are most suitable for smaller faces such as women or youths. M/L masks are most suitable for larger faces such as men or older teens. Smaller masks match smaller facial proportions by locating the Airhole breath hole higher up.

#### AIRTUBE ERGO

Our ergonomic Airtubes contour to the face to provide the best possible fit. The shape matches perfectly with your goggles to seal out the elements.

#### FACEMASK STANDARD

Our Standard Facemask is our patented design that revolutionized the facemask category and continues to be the worlds best selling mask. Further development for this season sees improved Velcro and fabrics.

#### BALACLAVA HINGE

The bedrock of the Airhole range, our Balaclava Hinge allows fabric with less stretch to function as full head and face protection whilst allowing you to pull the face portion under the chin to free your face and eliminating the need for a beanie.

#### BALACLAVA AIRHOOD

Our Balaclava Airhood is street inspired and has a customizable fit with 3 cinch zones. It will fit over a helmet or beanie and works as a stand-alone hood for keeping out the elements all whilst protecting your face with the built in mask.

#### MULTIFUNCTIONAL

Our multifunctional designs give our masks great versatility allowing them to be worn as neck gaiters, facemasks, balaclavas and headbands.

#### AIRTUBE CINCH

Our Airtube Cinch provides the ultimate cold weather protection. Utilizing a rear cinch to adjust the fit of the mask, the Airtube Cinch allows us to use fabrics not suitable for our traditional masks.

#### FACEMASK ERGO

Our Standard ergonomic facemasks contour to the face to provide the best possible fit. The shape matches perfectly with your goggles to seal out the elements.

#### BALACLAVA COMBO

A brand new shape for this season, our Balaclava Combo utilizes a Drytech head with a dual layer microfleece face. This allows both heat management and protection when required whilst still providing comfort under a helmet.
